- GATEWAY

Future Facility Notes

1. Waukesha County will reconstruct Janeville Road from Moorland Road to Racine Avenue to 4-lanes between 2011-2012.

2. The City of Muskego has budgeted to reconstruct Durham Drive from McShane Drive to North Cape Road (within the existing 2 lanes) between 2010-11.

General Facility Notes

1. Maintain a road improvement program that utilizes capital budget monies for improvements and/or new construction of City roadways and trails. The road program can be changed yearly, but should show improvements desired out to a 5-year period (At least showing tentative improvements). Further, the details on when roads and trails received maintenance, were constructed or reconstructed, or were resurfaced should be maintained by the City via a table or GIS in order for proper future road program budgeting decisions to be made.
2. Budget, at the same time of the yearly road program, to enhance and continually maintain the main gateways to the City so that they are attractively designed (The main gateways of the City are Racine Avenue north, Janesville Road east and west, and Moorland Road north).
