**RE: Bio-pile Annual Report 2020
Emerald Park Landfill, LLC
WDNR License No. 03793**

Dear Ms. Bekta:

Pursuant to Condition 9 of the Wisconsin Department of Natural Resources (WDNR) Plan of Operation for the Solid Waste Processing Facility Approval dated June 23, 1995, Emerald Park Landfill (EPL) is submitting this letter describing the Bio-pile activities during 2020.

A total of 2,908 tons of soils were accepted at EPL in 2020. A table summarizing the list of generators from 2020 is provided as Attachment 1. All of the bio-pile soils accepted in 2019 & 2020 were stockpiled on the northeast corner of Phase 3 to be included in the next Bio-pile. Due to the limited volume and timeframe of the biosoils accepted in 2019 & 2020, the site determined that it would not be efficient to conduct active remediation.

The bio-pile soils accepted in 2020 were combined with the biosoils from Bio-pile #20. The active remediation of Bio-pile #20 will begin in 2021 with the post-treated biosoils that meet the permit requirements being used as cover materials.

As soon as the treatment is completed and it meets the WDNR permit requirements, a closure report will be submitted and all other required information pertaining to Condition Number 9 & 10 of the WDNR Plan of Operations Approval will be submitted under separate cover.

If you have any questions or concerns during your review, please do not hesitate to call me at (414) 529-1360.

Sincerely,

Daniel Otzelberger

Dan Otzelberger
Landfill General Manager II
